Genus	Cymbidium	Award Number	2025-001
Plant Name	Cym. Miss Muffet 'Geoff'	Award	CCC
Parentage	Cym. devonianum	Points	83.00
	X Cym. floribundum	Venue/Region	Nelson
Owner	Lynley Buschl	Date	27/10/24

Description:

Photographer: Ross Bicknell

Large plant with peripheral spikes around the perimeter. Flowers maroon overlaid on green. Lip dark carman red overlaid on white. Petals and sepals with carman spotting. Callus butter yellow.

	Width (mm)	Length (mm)	Natural spread across petals (mm)	23.5
Dorsal Sepal			Natural spread across visible limits (mm)	
Petals			Natural spread vertically (mm)	39.8
Ventral Sepals			Inflorescences	17
Lip / Pouch			Flowers	414
			Buds	22

Genus	Renanthera	Award Number	2025-002
Plant Name	Ren. monachica 'Northwood'	Award	HCC
Parentage		Points	77.40
X		Venue/Region	Nelson
Owner	Lesley Newton	Date	26/10/2024

Description:

Photographer: Ross Bicknell

Well grown plant with branching inflorescence with 23 flowers & 30 buds. Flower petal and dorsal sepal lanceolate, ventral sepals spatulate and slightly recurved. Flowers pale orange with bright scarlet spots (S.G.) Substance firm & texture matt.

	Width (mm)	Length (mm)	Natural spread across petals (mm)	43
Dorsal Sepal	4	27	Natural spread across visible limits (mm)	43
Petals	5	22	Natural spread vertically (mm)	56
Ventral Sepals	8	27	Inflorescences	1
Lip / Pouch	5	8	Flowers	23
			Buds	30

Genus	Angraecum	Award Number	2025-003
Plant Name	Angcm. equitans 'Monaco'	Award	HCC
Parentage		Points	77.00
X		Venue/Region	Nelson
Owner	Gillian Lyster	Date	27/10/2024

Description:

Photographer: Ross Bicknell

Single flower. Pure white with crystalline texture and firm substance. Pollen cap lemon yellow with light pea-green surround. Ovary light green. Spur white. Spur 121mm long.

	Width (mm)	Length (mm)	Natural spread across petals (mm)	65.8
Dorsal Sepal	8.0	27.4	Natural spread across visible limits (mm)	65.8
Petals	6.3	24.9	Natural spread vertically (mm)	58.6
Ventral Sepals	6.7	30.3	Inflorescences	1
Lip / Pouch	17.2	27.1	Flowers	1
			Buds	0

Genus	Vanda	Award Number	2025-004
Plant Name	V. falcata 'Ruru'	Award	CCE
Parentage		Points	90.50
X		Venue/Region	Taranaki
Owner	Ninox Orchids	Date	18/01/2025

Description:

Photographer: Murray Dean

Very well grown plant with 33 inflorescences bearing the 87 flowers and 76 buds. The plant is in a 120mm pot which was suspended due to the pot being completely surrounded by the plant's roots. The flowers are white with long nectar spurs and are evenly distributed around the plant. The pollen cap was a light cream. Substance firm, texture matte.

	Width (mm)	Length (mm)	Natural spread across petals (mm)	25
Dorsal Sepal			Natural spread across visible limits (mm)	25
Petals			Natural spread vertically (mm)	74
Ventral Sepals			Inflorescences	33
Lip / Pouch			Flowers	87
			Buds	76

Genus	Cattleya	Award Number	2025-005
Plant Name	C. guttata 'Smokey'	Award	AM
Parentage		Points	84.33
X		Venue/Region	Kerikeri
Owner	Shawn Putt	Date	10/01/2025

Description:

Photographer: Shawn Putt

Eight star shaped flowers evenly distributed on one upright inflorescence (60cm high). Sepals and petals light olive green overlaid with deep magenta spots, sepal margins simple, petal margins undulate. Lip deep lilac, margin's undulate, side lobes light lilac. Texture glistening, substance firm.

	Width (mm)	Length (mm)	Natural spread across petals (mm)	96.5
Dorsal Sepal	16.3	53.8	Natural spread across visible limits (mm)	96.5
Petals	19.2	48.4	Natural spread vertically (mm)	99.8
Ventral Sepals	18.4	42.1	Inflorescences	1
Lip / Pouch	28.1	41.5	Flowers	8
			Buds	0

Genus	Cymbidium	Award Number	2025-006
Plant Name	Cym. Pee Wee 'Bidly'	Award	AM
Parentage	Cym. madidum	Points	81.10
	X Cym. floribundum	Venue/Region	Hawke's Bay
Owner	Jennifer Hope	Date	2/11/2024

Description:

Photographer: Gary Stephenson

Grown in a 230mm black plastic pot displaying an evenly grown miniature cascading cymbidium with eleven inflorescences, 177 open flowers and 131 buds. Longest inflorescence is 560mm. Overall colour of the blooms is olive yellow with dull rose red stripes centrally on petals and sepals. The labellum is bistre yellow with carmine-red spots and a dull orange throat. Pollen cap bistre yellow. The flowers are firm with a velvety texture.

	Width (mm)	Length (mm)	Natural spread across petals (mm)	23
Dorsal Sepal	5	18	Natural spread across visible limits (mm)	31
Petals	8	20	Natural spread vertically (mm)	31
Ventral Sepals	6	20	Inflorescences	11
Lip / Pouch	8	15	Flowers	177
			Buds	131

Description:

Photographer: Allan Rae

On entering the shade house, this plant is the first to attract the eye, an outstanding example of the 'Wow factor'. A truly glorious and fabulous well-flowered plant, this cymbidium is distinctive due to its intensely brilliant orange flowers, that are even more intense in bright sunlight. This sensation is augmented through the flowers' numbers, size and arrangement. Two straight and tall spikes carry a total of 27 flowers, which are around 110mm across visible limits. The petals and sepals display a golden yellow background and the unusually even spread of red pigmentation cells nearer the surfaces provide the outstanding orange display.

	X Phal. Charming Fortune	Venue/Region	Auckland
Owner	John Kernohan	Date	2/11/2025

Description:

Photographer: Glenys MacRae

Eye catching flower; greenish yellow (SG) petals and sepals; white basal halo radiating out approximately one third giving an ethereal effect. The pale rose-lilac (SG) labellum, white distally makes an attractive contrast. The colouring from the parent Phal. Fuller's Sunset has been enhanced in this cross giving the wow factor.

Description:

Photographer: Keith Smart

14 flowers, 1 inflorescence, strongly erect with flowers hanging down from the highest point. Flowers are light pink to pale pink with darker pink to magenta speckling and vermiculation, creating an overall mottled pattern. Dorsal sepals are broad to oblong, pale pink to white with a subtle pink flush, and a lightly convex surface. Lateral sepals are similar in color and shape. The lip is large and spoon-shaped with a deep crimson outer edge. The column is light pink, darkening near the anther cap, which is white with small crimson-maroon spots. A very eye-catching flower that displays itself naturally. Substance firm and texture matte

Description:

Photographer: Keith Smart

59 Flowers, 4 inflorescences, Slightly arching raceme, slight bunching but well-presented flowers. Flowers clean creamy pink with a deep burgundy maculated lip. Dorsal and lateral sepals ovate-lanceolate with entire margins, color predominantly white to cream featuring a very faint central mid-vein of pale pink. Petals slightly narrower than sepals with a slightly forward, identical ground color to sepals displaying a uniform texture. Labellum's main feature is deep burgundy maculation; mid-lobe recurved with a heavier concentration of confluent maroon-burgundy blotches against a white margin. Keels are yellow, anther cap is pale cream/yellow. Substance firm and texture matte

Description:

Photographer: Keith Smart

Sepals: They are arranged in a classic star shape, slightly cupped forward. The primary ground color is a deep, rich chocolate-maroon. **Margins:** A defining feature of this bloom is the distinct picotee edge. Each sepal and petal is bordered by a thin, clear line of pale yellow to cream, creating a sharp definition against the dark background. The sepals are broadly ovate with slightly acute (pointed) tips. The petals are similar in shape but slightly narrower and positioned closer to the column.

Labellum: Side lobes are erect, curving upward around the column, while the mid-lobe curves downward.

Throat/Base: The background color of the lip interior is white to creamy-white. **Markings:** It is heavily
